

Pattern template — basic bodice block

Printable working block with grain line, notches and seam allowance notes.

10 cm scale check — measure after printing

How to use this template

- Print at 100% scale, then verify the 10 cm scale bar before tracing.
- Trace the net line first, then walk seams before adding allowances.
- Grade sizes from the block, never from a finished garment pattern.
- Mark every notch on the hard copy so cutting and sewing match.
